

## ECLECTIC HOUSE PROJECT

*Architects: Venturi, Scott Brown and Associates, Inc.*

*Completion: 1977 (design sketches)*

These are sketches for a series of imaginary houses, with a program for a minimal vacation bungalow, living-dining, bedroom, and bath. This is a theoretical exercise on the idea of the decorated front and the ordinary or "Mary-Anne" behind. Style and function are juxtaposed rather than distorted; the styles are applied to the front while plan, section, and the other three elevations remain constant.
